DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney James Hamilton on 12 December 2006.

The application has been amended as follows:

Claim 33 (Currently Amended): An electromechanical microstructure comprising: a first mechanical part formed in a first electrically conductive material, and which comprises (1) a zone deformable in an elastic manner having a thickness value and an exposed surface and (2) a first organic film having a thickness, present on a whole of the exposed surface of the deformable zone,

wherein the first organic film is bonded in a covalent manner to the exposed surface of the deformable zone and formed from an electro-initiated reaction;

an annular zone at a surface of the first mechanical part, surrounding the exposed surface, having itself a surface and formed in a second electrically conductive

material, different in a sense of the electro-initiated reaction from the first electrically conductive material of the first mechanical part; and

a second organic film present on the surface of the annular zone, the second organic film formed in a material that may be deposited from an electro-initiated chemical reaction $_{\bar{\imath}}$.

wherein the first organic film is bonded in a covalent manner to the exposed surface of the deformable zone and formed from an electro-initiated reaction.

Allowable Subject Matter

Claims 33-40, 43-64 and 66-79 are allowed.
